DETAILED ACTION

Response to Arguments

Applicant argues first, the combination of the cited references does not achieve claims 21-40.

- 1. Baratono does not disclose a first side face of a mobile phone housing that is substantially perpendicular to the front face and a number keypad disposed in the first side face and consisting of a single aligned row of at least ten depressible input keys numbered from 0 through
- 9... Therefore, the combination of Baratono with Tanaka/Hama does not achieve claims 21-40.
- 2. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).
- 3. In response to applicant's argument that "Applicants' single aligned row of input keys in the first side face substantially perpendicular to the front face of the mobile phone housing allows the mobile phone to have a much smaller width W than mobile phones in the past, allowing the mobile phone to have a smaller, thinner, sleeker profile and making the mobile phone easier to carry (See Applicants' Application, paragraph 44). The motivation for adding a single line of buttons in Baratono has nothing to do with a mobile phone having a much smaller width W than mobile phones in the past, allowing the mobile phone to have a smaller, thinner, sleeker profile and making the mobile phone easier to carry", the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See Ex parte Obiaya, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Shedrick whose telephone number is (571)-272-8621. The examiner can normally be reached on Monday thru Friday 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kincaid Lester can be reached on (571)-272-7922. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
